VERTICA

The International Journal of Rotorcraft and Powered Lift Aircraft

Editor-in-Chief
P. Friedmann (University of California, U.S.A.)

Author Index and Volume Contents

VOLUME 11, 1987

PERGAMON PRESS

Oxford · New York · Beijing · Frankfurt · São Paulo · Sydney · Tokyo · Toronto

VERTICA

The International Journal of Rotorcraft and Powered Lift Aircraft

Editor-in-Chief
Professor P. Friedmann
Mechanical, Aerospace and Nuclear Engineering Department, University of California,
5732H Boelter Hall, Los Angeles, CA 90024, U.S.A.

Associate Editors

Dr W. Johnson
Johnson Aeronautics, Palo Alto, CA
94301, U.S.A.

Dr F. Straub
Aeromechanics R & D, McDonnell Douglas
Helicopters, Mesa, AZ 85205, U.S.A.

Editorial Advisory Board

Professor I. C. Cheeseman
University of Southampton, U.K.

Professor A. Azuma
University of Tokyo, Japan

Professor I. Chopra
University of Maryland, U.S.A.

R. Dat
ONERA, Châtillon, France

Professor G. T. S. Done
The City University, London, U.K.

Professor N. D. Ham
Massachusetts Institute of Technology, U.S.A.

Mr Anton J. Landgrebe
United Technologies Research Center, U.S.A.

Dr M. V. Lowson
Westland Helicopters Ltd, U.K.

Professor R. G. Loewy
Rensselaer Polytechnic Institute, U.S.A.

Dott. Ing. B. Lovera
Construzioni Aeronautiche
Giovanni Agusta S.p.A., Italy

Dr Robert A. Ormiston
US Army Research & Technology Labs, U.S.A.

Professor D. A. Peters
Georgia Institute of Technology, U.S.A.

M. G. Petit
Société Nationale Industrielle Aérospatiale
France

G. Reichert
Technical University Braunschweig,
West Germany

Dr R. E. Singleton
U.S. Army Research Office, U.S.A.

Professor H. Wittenberg
Technische Hogeschool Delft, The Netherlands

Subscription Rates (1988)

Annual institutional subscription rate (1988) DM 490.00; 2-year institutional rate (1988/89) DM 931.00; personal subscription rate for those whose library subscribes at the regular rate (1988) DM 157.00.

Subscription enquiries from customers in North America should be sent to: *Pergamon Journals Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A.* For the remainder of the World to: *Pergamon Journals Ltd, Headington Hill Hall, Oxford OX3 0BW,* England (*Tel.* Oxford (0865) 64881). Prices are subject to amendment without notice.

Microform Subscriptions & Back Issues

Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm on completion of the annual index at the end of the subscription year.

Publishing Office

Pergamon Journals Ltd, Journals Production Unit, Hennock Road, Marsh Barton, Exeter, Devon EX2 8NE, England (*Tel.* Exeter (0392) 51558; *Telex* 42749).

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights ro reproduce and distribute the article, including reprints, photographic reproductions, microform, or any other reproductions of similar nature, and translations. No part of this publication may be produced, stored in a retrieval system, or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording, or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A.

The Item-Fee Code for this publication indicates that authorization to photcopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the U.S. Copyright Law is paid. The appropriate remittance of $3.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works or for resale.

Permission for other use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying. Please contact the Subsidiary Rights Manager (Publishing Services) at either Pergamon Journals Ltd (Oxford) or Pergamon Journals Inc. (New York).
The Item-Fee Code for this publication is: 0360-5450/87 $3.00 + 0.00

RECENT TRENDS IN HELICOPTER TECHNOLOGY

	1	Foreword
G. R. Srinivasan and W. J. McCroskey	3	Numerical simulations of unsteady airfoil–vortex interactions
H. C. Curtiss Jr, W. Erdman and M. Sun	29	Ground effect aerodynamics
Sanford S. Davis and I-Chung Chang	43	The critical role of computational fluid dynamics in rotary-wing aerodynamics
Akira Azuma, Shigeru Saito and Keiji Kawachi	65	Response of a helicopter penetrating the tip vortices of a large airplane
Robert T. N. Chen and William S. Hindson	77	Influence of dynamic inflow on the helicopter vertical response
P. Hamel, B. Gmelin, J. Kalekta, H.-J. Pausder and H.-J. Langer	93	Helicopter aeromechanics research at DFVLR; recent results and outlook
Norman D. Ham	109	Helicopter individual-blade-control research at MIT 1977–1985
Marc Achache and Michel Polychroniadis	123	Development of an experimental system for active control of vibrations on helicopters—development methodology for an airborne system
Peretz P. Friedmann	139	Recent trends in rotary-wing aeroelasticity
Wen-Liu Miao	171	Influence of pitch axis location and orientation on rotor aeroelastic stability
Brahmananda Panda and Inderjit Chopra	187	Dynamics of composite rotor blades in forward flight
A. Rosen and O. Rand	211	A model of a curved helicopter blade in forward flight
Swami N. Karunamoorthy and David A. Peters	233	Use of hierarchical elastic blade equations and automatic trim for rotor response
R. Dat	249	Some basic methods of structural dynamics and unsteady aerodynamics and their application to helicopters
R. G. Loewy, A. Rosen and M. B. Mathew	263	Application of the principal curvature transformation to nonlinear rotor blade analysis
Dewey H. Hodges	297	Finite rotation and nonlinear beam kinematics
Alex Berman	309	Uncertainties in dynamic data from analysis or test of rotorcraft
Wayne Johnson, Benton H. Lau and Jeffrey V. Bowles	317	Calculated performance, stability, and maneuverability of high speed tilting proprotor aircraft

D. G. Astridge 341 Health and usage monitoring of helicopter mechanical systems

C. W. de Jong 359 European Rotorcraft Forum (ERF): index of ERF-papers 1975–1985

Number 3

Wolfgang Buchs and Horst Bansemir 407 Structural design and analysis aspects of composite helicopter components

F. K. Straub 425 Optimal control of helicopter aeromechanical stability

Stephen P. King 437 The Westland rotor head vibration absorber design principles and operational experience

H. Bergh and A. J. P. van der Wekken 447 Comparison between measured and calculated stall-flutter behaviour of a one-bladed model rotor

Keiji Kawachi 457 An analytical study of impulsive destruction of the tail-rotor-drive-shaft

R. W. Gent, R. H. Markiewicz and J. T. Cansdale 473 Further studies of helicopter rotor ice accretion and protection

D. Favier, M. Nsi Mba, C. Barbi and C. Maresca 493 A free wake analysis for hovering rotors and advancing propellers

Arturo Baron, Sergio De Ponte and Biagio Mignemi 513 Three component hot-wire measurements in the wake of a rotor model

P. A. Blelloch and P. P. Friedmann 525 A study of some approximations in the modeling of a coupled rotor/fuselage aeromechanical system

Aviv Rosen, Robert G. Loewy and Mathew B. Mathew 541 Use of twisted principal coordinates and non-physical coordinates in blade analysis

Dewey H. Hodges 573 Nonlinear beam kinematics for small strains and finite rotations

R. Stuff 591 Supersonic rotor noise calculation with sonic boom prediction methods

i Guidelines for the preparation of typescripts for direct reproduction

Number 4

R. H. G. Müller and R. Staufenbiel 601 The influence of winglets on rotor aerodynamics

Robert T. N. Chen and Mark B. Tischler 619 The role of modeling and flight testing in rotorcraft parameter identification

V. T. Nagaraj and Niranjan Sahu 649 Influence of transformation sequence on nonlinear bending and torsion of rotor blades

G. D. Padfield, R. Thorne, D. Murray-Smith, C. Black and A. E. Caldwell 665 U.K. research into system identification for helicopter flight mechanics

J. S. Pollard 685 Blade/vortex interactions and noise abatement techniques during descent

Kenneth P. Leighton and Wesley L. Harris	701	Mach number scaling of helicopter rotor blade/vortex interaction noise
Morgan Williams and Wesley L. Harris	715	On helicopter rotor flow frequency broadband noise
David R. Clark	731	Analysis of the wing/rotor and rotor/rotor interactions present in tilt-rotor aircraft
Andrew J. Niven and Roderick A. McD. Galbraith	751	The effect of pitch rate on the dynamic stall of a modified NACA 23012 aerofoil and comparison with the unmodified case
Melvin Niederer and Daniel B. Goetschel	761	Elastic hingeless scissor design
